

SAP PLANT MAINTENANCE WORK ORDERS

SYS-SAPP-03

\$599 AUD excl. GST

OVERVIEW

Now that your Notifications are approved. It's time to create a Work Order! Work Orders are an integral part of the process as it is when we start planning and scheduling all relevant resources to help facilitate the completion of the Notification and the request for Maintenance. We will look at asset lifecycle maintenance plans, types of maintenance, planning resources for work, reviewing statuses and priorities, and creating and copying work orders. This will set you up with the fundamentals in creating and managing a workable work order.

Designed for Maintainers, Planners, Supervisors, Master Data and System Professionals.

It is recommended that learners have knowledge of **SAP Essentials**, **SAP Plant Maintenance Notifications** and **Work Management Fundamentals** prior to starting this course.

All AMLA online courses can be completed in your own time and at your own pace with the assistance of course forums, online chat, and email. Courses are accessible for 12 months from enrolment.
