

# COVID-19 AWARENESS

## LED-FUND-09

Employers have certain obligations under legislation to take reasonable steps to ensure the safety and health of workers and others at the workplace. This includes providing information about the risks of exposure to COVID-19 and in some cases infection control. Although COVID-19 has become a Pandemic, it has also given rise to an infodemic. AMLAs experienced Australian Workplace Health and Safety professionals have teamed up with their technical design team to create this course to support sharing information about coronavirus disease, the differences when compared to influenza, information about infection, prevention and control, treatment and vaccination.

### DESIGNED FOR

Everyone

### PRE-REQUISITES

None

### DURATION

As little as 1 hour self-paced online. Courses are accessible for 365 days from enrolment.

### SCHEDULE AND STRUCTURE

This program consists of 1 nominal hour of online learning over the course of enrolment. The course modules are required to be completed consecutively, with each a pre-requisite for the next.

### LEARNING OUTCOMES

At the successful completion of this course, the learner should be able to:

- Explain what COVID-19 is and how it spreads.
- Identify the most common symptoms associated with COVID-19.
- Explain the precautions you should take to minimise and prevent the spread of COVID-19.
- Explain how COVID-19 is treated and the types of vaccines available.
- Recognise some common myths about COVID-19 and the corresponding facts.

### TEACHING ACTIVITIES

Animated lectures, video tutorials, interactive activities, audio content, labeled reference images and step by step instruction.

### LEARNING ACTIVITIES

Learning goals activity sheet, reflection activity sheet, case study activities, step by step exercise activities.

### SUPPORT

Course forum, online chat and email.

### ASSESSMENT

End of module knowledge assessments, each with a 80% pass rate required.

## COURSE STRUCTURE

## MODULE OBJECTIVES

### Introduction and Overview

Overview of the course structure, online health and safety and setting your learning goals.

### What is COVID-19?

Here we go back to the beginning, which is still very fresh in our minds. We explain in more detail what COVID-19 is, how it is spread and how to test for it. We also talk about quarantine and isolation and the Australian governments response.

### Vaccines and treatment

All the science lovers will geek out in this module, as we talk about the different types of vaccines which exist and how they work. We mean all types, not just covid vaccines. Once we understand the basics, we will dive into talking about the vaccines for COVID-19 that are available in Australia.

### Preventing and controlling transmission

Its pretty easy to feel like you have no control in a pandemic, after all, this would fall into the 'circle of concern' - for those that have completed our Introduction to AMLA course, you will remember the 'Circle of Control'.

So in this module, we will talk about our approach and what we can control.

### Managing mental health and misinformation

Mental health was important before COVID-19, and it was gaining alot of headwind. Now its everywhere and its more important than ever before, so lets talk about why.

This is then the perfect segue into what people are calling 'the infodemic'. If you haven't heard about this already, well - you are in for a treat.

### Course Completion

Summarise what has been learnt and review the learning goals. The final assessment is completed here. An opportunity to submit course feedback is also available at the end of this course.
